 - (b) Based on the attached report prepared by a relevant licensed professional.

However, if the City determines that a Creek exists on or near the project site, a Creek Protection Permit is required.
- (3) **A Creek DOES exist on or near the project site and *(check one)***
 - (a) The proposed project only entails interior construction, and therefore requires a **Category 1 Creek Permit** (this is a no fee permit and only requires distribution of educational materials); or
 - (b) The proposed project entails exterior work that does not include earthwork and is located more than 100 feet from the centerline of the Creek, and therefore requires a **Category 2 Creek Permit** (this permit requires a site plan and distribution of educational materials); or
 - (c) The proposed project entails (a) exterior work that is located between 20 feet from the top of the Creek bank and 100 feet from the centerline of the Creek, and/or (b) exterior work that includes earthwork involving more than three (3) cubic yards of material located beyond 20 feet from the top of the Creek bank, and therefore requires a **Category 3 Creek Permit** (this permit requires a site plan and creek protection plan and may require environmental review); or
 - (d) The project entails exterior work conducted from the centerline of the Creek to within 20 feet from the top of the Creek bank, and therefore requires a **Category 4 Creek Permit** (this permit requires a site plan and creek protection plan and may require environmental review and a hydrology report).

STEP 1: GREEN BUILDING REQUIREMENTS

Pursuant to the California Green (CALGreen) Building Standards Code, all new residential construction requires completion of a CALGreen Checklist (download at <https://aiacalifornia.org/calgreen-checklists>). Further, Title 24, Part 11, Section 301.1.1 states that the “mandatory provisions of Chapter 4 shall be applied to additions or alterations of existing residential buildings where the addition or alteration increases the building’s conditioned area, volume, or size. The requirements shall apply only to and/or within the specific area of the addition or alteration.” As such, **any Accessory Dwelling Unit (ADU) that meets these conditions is also subject to Chapter 4 CALGreen requirements**, which are outlined here: http://www.hcd.ca.gov/building-standards/calgreen/docs/HCDSHL605_2016.pdf

I, THE APPLICANT/OWNER, ATTEST THAT: *(check all that apply)*

- (1) I am submitting a completed CALGreen Checklist with my application.
- (2) If constructing an Accessory Dwelling Unit (ADU) that meets the conditions as quoted above in code Section 301.1.1, I acknowledge that I also **MUST** comply with all Chapter 4 CALGreen mandatory measures and obtain verification by a qualified third-party inspector. I am submitting any additional green building plans with this application.

STEP 2: RECOMMENDED GENERAL STANDARDS FOR DRAWINGS SUBMITTED WITH BUILDING PERMIT APPLICATIONS

PRO TIP: *If these recommended standards are followed, it will speed the permit and plan check process, provide for more durable jobsite copies, aid the Planning & Building Department when adding standard sized City information sheets and reduce problems during construction.*

STANDARD REQUIREMENTS:

ACCEPTABLE SHEET SIZE: 22" x 34" or 24" x 36" is preferred. 18" x 24" minimum, 36" x 48" maximum. Drawings should be standard drawing size: 18" x 24", 22" x 34", 24" x 36", 18" x 24", 30" x 42", or 36" x 48". Sets of 4 or less 8 ½" x 11" or 11" x 17" are not desirable, but will be taken in.

If drawings were done at a smaller size (11" x 17" or 8 ½" x 11"), applicant can "paste up" to a standard size and have a Xerox vellum master run at a printing company. These can be used to make the bluelines or blacklines prior to submitting for permit.

Standard size bluelines of odd-sized originals are acceptable if all information is shown on the blue line.

BORDER REQUIREMENTS: 1 ½" minimum at left-hand bound edge, ½" minimum elsewhere; each sheet should have borderlines.

TITLE BLOCK REQUIREMENT: Each sheet shall have title block indicating (1) Project title and address; (2) Owner's name, mailing address, daytime phone and fax number; (3) drawing preparer's name, address, daytime phone and fax number; (4) pertinent Consultant's name(s), mailing address, phone and fax number(s); (5) sheet number of total number or sheets (i.e.: 1 of 7, 2 of 7, etc.); (6) revision number, and (7) indication of latest date of preparation, printing.

ELECTRONIC STAMP: Provide blank spots 3" wide x 4" tall on each sheet of the plans to allow for electronic stamps to be placed.

NOT ACCEPTABLE:

1. DRAWINGS LESS THAN 18" X 24" (or set with more than 4 sheets of 8 ½" x 11" or 11" x 17". *Smaller drawings make plan checking more time consuming and difficult, are more easily lost or damaged, lack of room for borders results in poor copies and lost information, and tendency to omit information if there is a lack of drawing space.*) **OR LARGER THAN 36" X 48"** (*too large to handle in plan check cubicles*).

2. XEROXED COPIES (*not durable for job site*).

3. ORIGINAL DRAWINGS (*can be easily altered during permit issuance*).

4. DIFFERENT SIZE SHEETS IN A DRAWING SET (*except survey and/or plot plan may be different size from the other drawings if they are the same size as each other*).

5. DRAWINGS TAPED TOGETHER, OR SHEETS WITH SMALLER DRAWINGS TAPED, STAPLED, OR PASTED ON (*these are not durable and will tend to get torn or ripped off*).

6. DRAWINGS WITH INFORMATION ADDED IN RED EXCEPT BY CITY STAFF.

7. DRAWING SHEETS WITHOUT BORDERS OR WITH INFORMATION CROSSING OVER BORDERS (*information may be lost due to misalignment when having copies made at the printer*).

8. DRAWINGS WITH LETTERING LESS THAN 1/8-INCH-HIGH OR ILLEGIBLE LETTERING (*not suitable for microfilming or making reduced size copies*).

9. UNBOUND, UNSTAPLED DRAWING SETS

10. DRAWINGS WITHOUT TITLES, PERTINENT ADDRESS AND PHONE NUMBERS, OR WITHOUT PREPARER'S WET SIGNATURE ON EACH SHEET

11. POOR QUALITY BLUELINE OR BLACKLINE COPIES WITH POOR CONTRAST OR DIRTY BACKGROUND.

STEP 2: BUILDING CRITERIA CHECKLIST

Applicant's Name: _____ Project Address: _____

DRX Project Application Number: _____

Accessory Dwelling Units (ADUs) may only be granted if the applicant can check "YES" or "N/A" to EACH of the following:

GENERAL BUILDING CODE REQUIREMENTS

ADU'S ARE SUBJECT TO THE APPLICABLE REQUIREMENTS AND PROVISIONS OF THE CALIFORNIA BUILDING CODE, CALIFORNIA RESIDENTIAL CODE, AND CALIFORNIA EXISTING BUILDING CODE.

ADU'S REQUIRE SEPARATE ADDRESSES. JUNIOR ADU'S MAY NOT BE ADDRESSED SEPARATELY FROM THE PRIMARY DWELLING.

YES NO N/A ADU and primary residential facility each has an independent entryways/exits (means of egress) to the exterior point of discharge of the existing building or to the public right of way. Primary entry/exit and path of travel to ADU meets code requirements for stairs, handrails, landings, headroom, door width, etc. ADU path of egress shall not be through the primary or other dwellings.

YES NO N/A UTILITIES: Per California Public Utility Commission CPUC 780.5 ADUs shall have separate electrical meter; ADU will not require separate electrical connection (drop) from PGE; ADU has access to its own electrical panel; ADU plumbing branch connection to the sewer lateral does not exist underneath the primary residential facility; one (1) gas meter exists per each dwelling unit (except if ADU has no vented appliances, in which case one gas meter may serve two units), plus one (1) for a common area (i.e., laundry facilities); detached ADU has its own water shutoff valve where service enters building or attached ADU without separate water shutoff has integral stops or fixture shutoffs; each dwelling unit has permanently installed heating and water heating facilities with its own access to controls and equipment. For more information please refer to a joint ADU Bulletin: <https://cao-94612.s3.amazonaws.com/documents/City-of-Oakland.PGE-Joint-Information-Bulletin-METERS-FINAL.pdf>

YES NO N/A ADU meets all code requirements for moisture barriers and damp proofing (foundation and foundation walls below grade include damp proofing, waterproofing, drainage, and vapor retarder), braced wall panels or shear walls, and all energy code requirements (for new construction or conversion of non-habitable space to new ADU).

(continued)

STEP 2: BUILDING CRITERIA CHECKLIST (continued)

YES NO N/A

Buildings dug down meet code requirements for new construction at that lower level and include engineering plans for the foundation and for the gravity and lateral load resisting system of the building.

YES NO N/A

ROOM DIMENSIONS: ADU ceiling height is not less than 7 feet-6 inches for habitable space, hallways, and portions of basements containing these spaces, and 7 feet for bathrooms, toilet rooms, and laundry rooms; has a combined living, eating, and sleeping room not less than 150 square feet, and an additional 100 square feet of superficial floor area per occupant in excess of two (2) occupants; has a separate permanent clothes closet.

YES NO N/A

ADU is located entirely within the subject property and meets required building fire separation distance requirements (may require Surveyor certification).

YES NO N/A

ADU shall be heated separately. Each tenant or owner shall have access to their own mechanical heating equipment and water heater. A central Mechanical Room is permitted provided that each tenant or owner has access without being compelled to pass through another unit. Heating, Air conditioning or ventilating systems shall not combine return air supply from separate dwelling units.

YES NO N/A

BUILDING SAFETY: All exterior walls of the ADU are appropriately fire-rated based on Fire Separation Distance, Construction Type, and applicable provisions of the California Building Code (CBC). No wall openings exist less than 5 ft. (3 ft if sprinklered) to property line. All separation walls and floor/ceiling assemblies, plus their supporting construction for attached units, are appropriately fire and/or smoke rated per the applicable provisions of the CBC. Fire sprinklers are installed in entire building when total floor area (ADUs plus Primary Residential Facility) exceeds 3,600 sq. ft. as a result of an addition or when changes of occupancy classification occur. Fire sprinklers are installed in ADUs when the primary residential facility is required to be protected by fire sprinklers.

YES NO N/A

If the proposal is for a new, or substantial rehabilitation of an existing, primary residence, the nearest hydrant has a flow greater than 1,000 gallons per min. (gpm) and minimum pressure of 20 pounds per sq. inch (psi).

YES NO N/A

Attached ADUs require minimum Sound Transmission Classification (STC) rating 50-45 when tested per American Society for Testing and Materials (ASTM) E90 or STC 50.

YES NO N/A

All other building code requirements are met.

Note: Demolition or deconstruction of greater than 50% of an existing building will require a demolition permit and will be considered a new building and not a conversion for the purpose of determining applicable building Codes as per Code Bulletin D-18-001. If during construction, field conditions warrant removal of more than 50% of the building a revision shall be submitted prior to continued removal of building components. Lifting or moving of buildings is subject to Code bulletin D-18-001.

I have reviewed the above checklist and certify that the project conforms to all applicable criteria for Step 2.
