

Data was collected between 6 am and 6 pm during June 2021 on a Tuesday, Wednesday, and Thursday. A technician drove north and south along the corridor to record the location of vehicles that were stopped on Frontage Road either in the median or along either shoulder. Data collection activity may have discouraged longer parking along the roadway. As a result, tables show the number of unique vehicles observed parking rather than amount of time parked.

- Parking was concentrated on the southern section of the road between 7th and 14th Streets.
- Trucks parking on the road included vehicle associated with the Port and not with the Port.
