

Where Should Safety and Urban Design Strategies Go?

Please use the letters A to G as shown on the other posters to mark where you think each safety and urban design strategy could be used.

Safety & Urban Design Strategies to Reduce Roadway Conflicts

Would any of these example strategies help with streets used by Port and OAB trucks?
Please mark the locations on the maps with the strategies you recommend, or propose your own strategy.

Strategy A Add a High-Visibility Crosswalk

Strategy B Repair Potholes and Street/Sidewalk Damage from Trucks

Strategy C Add a Speed Bump

Strategy D Add a Raised Intersection/Pedestrian Crossing

Safety & Urban Design Strategies to Reduce Roadway Conflicts

Would any of these example strategies help with streets used by Port and OAB trucks?
Please mark the locations on the maps with the strategies you recommend, or propose your own strategy.

Strategy
E Install Pedestrian Countdown Timers

Strategy
F Install Barriers between Roadway and Bike Path (example shown)

Strategy
G Plant Vegetation for Partial Screening near Truck Businesses or Truck Routes
